Wholesale energy price rise

In the first 3 months of the year, wholesale energy prices saw a year-on-year increase of 141%, and they continue to rise - these will begin to flow through to retail prices across both small business and residential customers from July 1st.

The rise is being driven by a multitude of factors - coal power stations closing (Liddell in April 2023 and Eraring closing 7 years early in 2025) plus a number of outages; global oil, gas and coal prices, unrest in Europe, plus weather events. Many markets are seeing price rises and volatility at this time.

Rate change notification

In the coming weeks, you will receive a rate change notification from your current retailer detailing what your new pricing will be and how this will affect your energy contract moving forward.

This is where we come in! Let us help you to maintain the best possible price in a rising market.

Start saving today

MiC will do a completely free comparison and let you know whether we can find your business savings or whether it is best to stay put with your current retailer.

Now is the time to take action, we want to ensure you are not paying any more than you need to in the current volatile market!
